

AgustaWestland is a powerful force in the world helicopter industry capable of satisfying market demand by offering a wide civil/military product range encompassing all main weight categories with a full variety of missions.

A Wide Range of Integrated Platform systems

AgustaWestland is acknowledged among commercial operators to deliver high performance and cost-effective helicopters while defence market appreciates its leading-edge solutions which make each helicopter a fully operational system, not just a platform. Products range from the innovative AW119 Ke 2.8-ton single engine to the AW101 16-ton three-engine helicopter. Other products include the AW109 Power, AW109 LUH and Grand light-twin, the AW129 combat helicopter, the multi-role Super Lynx, the AW139 medium twin, the BA609 Tiltrotor and the NH90 11-ton. New products recently launched include the AW149 and the AW159 military helicopters which further expand the product range.

Partnerships To Span The World

AgustaWestland is actively participating in a number of joint ventures and collaborative programmes with major European and American aerospace and defence companies as well as partnerships with other firms worldwide. This co-operations network has contributed to expand products range and increase market share and opportunities.

Heavy Investments in R&D

AgustaWestland firmly believes investing in R&D means offering the widest range of solutions for both current and forthcoming customers' needs by expanding existing products capabilities as well as installing state-of-the-art technologies in its future programmes and developing revolutionary rotorcraft. For this purpose the company is not only investing in its own technology research but it is also co-leader of the European Clean Sky rotorcraft joint technology initiative, which is researching external noise reduction technologies, cleaner and more efficient use of power, as well as environmentally friendly flight

paths. AgustaWestland is also studying Tiltrotor and Tiltwing technologies which will redefine next generation of rotorcraft with an innovative approach for a number of missions.

A New Class in Customer Support

AgustaWestland is focussed on supporting its Customers to reduce costs of ownership while improving operational capabilities. The Company's award winning Integrated Operational Support (IOS) are delivering Government customers increased aircraft operational effectiveness while driving through life costs down. AgustaWestland offers its commercial Customers a wide range of service plans and industry leading warranty programmes while supporting the product during its entire operational lifecycle through both dedicated sites and via a network of Supply and Service Centres around the world that stock spares and are authorised to carry out repair and overhaul services for AgustaWestland helicopters.

A Complete Range of Training Solutions

AgustaWestland is also an established provider of professional training services. Military customers are assured of receiving highly effective Training Solutions, designed to meet their requirements to achieve high levels of individual, team and collective performance. Commercial customers are able to benefit from investments made by AgustaWestland in training and integrated learning environments developed to enable the full exploitation of the company's high performance aircraft. Training solutions encompass e-learning, part-task maintenance and procedures trainers through to full mission and level D flight simulators.
