

DRS Technologies, headquartered in Parsippany, New Jersey (U.S.), is a leading supplier of integrated products, services and support to military forces, intelligence agencies and prime contractors worldwide.

Focused on defense technology, the Company develops, manufactures and supports a broad range of systems for mission critical and military sustainment requirements, as well as homeland security. The company has been recognized as one of the fastest growing defense technology companies in the world and holds leading market positions in thermal imaging devices, combat display workstations, electronic sensor systems, power systems, rugged computer systems, air combat training systems, mission recorders, deployable flight incident recorders, environmental control systems, telecommunication systems, aircraft loaders, military trailers and shelters, and integrated logistics support services.

DRS's broad range of mission critical systems and sustainment solutions uniquely position the company to support the ongoing superiority of the military's current force, as well as the modernization and emerging transformation initiatives of the future force. DRS's products are deployed on a wide range of high-profile military platforms and on several platforms for non-military applications.

Our sustainment products, such as environmental control systems, power generators, water and fuel distribution systems, chemical/biological decontamination systems and heavy equipment transport systems, are used to support military forces, humanitarian efforts and peacekeeping. We also provide security and asset protection systems and services, telecommunication and information technology services, training and logistics support services for all branches of the U.S. armed forces and certain international militaries, homeland security forces, and select government and intelligence agencies.

DRS strives to provide quality products and services and stand behind them, to invest in research and development and new market opportunities, and to leverage existing core defense programs and business areas.

Defence and Security Electronics

Those serving in demanding operational environments require next-generation solutions that allow them to be better equipped, rapidly deployed and easily sustained. Our surveillance, reconnaissance and target acquisition capabilities, tactical computing, secure communications and networks allow operators to act first and finish decisively. We focus on supporting military forces with the most advanced technology solutions in order to drive operational success.

Security and Resilience

In an era of heightened terrorist threats, countries struggle to protect their national borders. DRS specializes in border/perimeter surveillance, entry point screening, intrusion detection and applied biometrics. DRS also delivers sophisticated Unmanned Aerial Surveillance platforms with a variety of multi-sensor platforms in order to offer today's modern forces a full range of surveillance and reconnaissance products.

Training

DRS helps prepare military aircrews through advanced technology and threat simulation systems to help train aircrews in a controlled environment before they engage in actual air combat, as well as cost effective, laboratory-based platform that facilitates the training of military Signal Intelligence (SIGINT) personnel in Communications Intelligence (COMINT) related disciplines.

DRS Technologies is constantly working with our customers to develop advanced solutions to ensure their mission success.
